THE DOCTOR LAUGHED
But the Woman was Frightened.
A physician of Columbus, Ga., rather poked fun at a lady patient who insisted she had heart disease.
The trouble really was caused by coffee drinking, and the nerves were so affected that it gave her every indication of heart disease. This is true of thousands of people who are badly hurt by the caffeine of coffee, and it is understood that if continued long enough, real organic heart disease will set in.

The lady referred to above says: "I had been running down in health for a number of years and suspected that coffee was hurting me but could not get up courage to quit it. My heart troubled me so that I was very short of breath, and could do little or nothing that required exertion. I had fearful nervous headaches nearly every day, and was exceedingly nervous, with indigestion and badly constipated."
The doctor laughed at my idea of heart trouble, but knew that I was in a serious condition generally. Finally I was induced to quit coffee and take Dr. Williams' Pink Pills. This change has been wonderful. I feel like another person.
"My heart does not trouble me at all, and the stomach and nerves are decidedly improved. My head does not give me the old trouble it did, while the bowels are regular without any purgatives or medicine of any kind."
"I can hardly express my gratification for the relief from suffering brought on by the use of coffee, and I cannot thank Postum enough." Read "The Road to Wellville," in Pears. Physicians call it "A Health Classic." "There's a Reason."

ELECTRIC MAIL BOX DEVICE

WILL BE PLACED ON THE MARKET BY GUTHRIE COMPANY

BELL RINGS WHEN BOX IS OPENED

Will Be of Especial Convenience to Busy House-Wives and Farmers.

Guthrie is to have a factory through the organization of the Electric Mail Box company, with \$20,000 capital stock, the most of which is subscribed by local people. The company has bought the patent of W. H. Grandee, formerly of Oklahoma City and now of Denver, paying a handsome price for the device. The mail box is to be made of galvanized tin and will have an electric connection, which when the mail man opens the box to put in a letter, will cause two distinct rings of an electric bell placed within the house. The electric box will also prove a decided improvement in the rural districts, as by the means of electric connection the farmer can tell when the mail man arrives, although he may be more than a half a mile away from the box. The company proposes to manufacture the electrical mail boxes in Guthrie, which will be the distributing point for their sale.

The officers and directors of the company are: J. M. Brooks, president; George Gardner, proprietor of the Lion store at Oklahoma City, vice president; C. R. Renfro, of Guthrie, treasurer; H. W. Peacock, of Guthrie, temporary secretary; C. E. Hunter, clerk of the district court at Oklahoma City; H. M. Fielding and Geo. W. Frasier, of Guthrie. Besides these there are a number of influential business men among the stockholders.

Temporary offices have been opened in the Lyon block and the promoters have every reason to believe that the device will prove a success in every particular. J. M. Brooks left last night for Chicago to make arrangements to have some of the machines manufactured at once, so as to get them on the market as soon as possible.

As a delegate to the annual convention of the National Electric Medical Association June 18 to 21. From there they will visit points on the Pacific coast before returning.

The Woman's Relief Corps will hold the regular meeting Friday night at Odd Fellows hall, corner Broad and Harrison avenue. Business of importance besides initiation will come up.
